

Back to School Frequently Asked Questions

School Scenarios for household members that are students or working in schools.

Question	Response	What resources can I look to, to find this answer or more information?
<p>What do I do if my child/ household member contracts COVID—19?</p>	<p>If you are a close contact of someone with COVID-19, you need to notify your supervisor, self-isolate from work, and seek testing. If your test results are negative, you can return to work and self-monitor for symptoms. If your results are positive, you must notify your supervisor and self-isolate for 14 days.</p>	<ul style="list-style-type: none"> • Employee Exposure Scenario Flowcharts • COVID-19 Screening Protocol • COVID-19 Attendance and Testing Guide
<p>What do I do if my child/ household member is sent home because they are a close contact of a COVID-19 case?</p>	<p>Your household member will be asked to seek testing (sometimes 5-7 days after last exposure to the confirmed case).</p> <p>Employees can continue to work as long as their close contact has no symptoms. If the close contact develops symptoms or tests positive for COVID-19, the employee must notify their supervisor, self-isolate from work, and seek testing.</p>	<ul style="list-style-type: none"> • Employee Exposure Scenario Flowcharts • COVID-19 Attendance and Testing Guide
<p>What do I do if my child/ household member is sent home because they have symptoms of COVID-19?</p>	<p>If your close contact has symptoms, you need to book an appointment to get tested.</p> <p>As an employee working in a congregate care setting, you can be tested at a participating pharmacy if you are asymptomatic. Notify your supervisor and self-isolate while you await test results. Return to work if test results are negative. If the employee’s results are positive, you must notify your supervisor and self-isolate for 14 days.</p>	<ul style="list-style-type: none"> • Employee Exposure Scenario Flowcharts • COVID-19 Attendance and Testing Guide • COVID-19 Screening Protocol

- Examples of **close contact**: Living with or had close prolonged contact (more than 15 mins) with the suspected or confirmed person; had direct contact with bodily fluids of a confirmed case (e.g., coughed on, sneezed on, etc.).
