

# ENHANCED CLEANING

WHEN COVID-19 SUSPECTED OR CONFIRMED

## Wash your hands

thoroughly, for at least 20 seconds before and after cleaning.

## Wear PPE

as appropriate, while cleaning, as per product instructions.

## Clean and disinfect

frequently touched\* surfaces and objects **twice per day**.

- Use a cleaning schedule
- Clean common areas (eg. bathrooms) twice per day or when dirty.
- Clean shared equipment (phones, electronics, etc.) after each use.
- Surfaces touched during family visits and vehicles should be cleaned between uses.

*\*Frequently touched surfaces include: doorknobs, handrails, light switches, cabinet handles, faucet handles, tables, countertops and electronics.*

## Take out garbage

using gloves and a mask.

Where possible, use no-touch, lined garbage bins.

## Wash laundry

Handle laundry of people with suspected or confirmed cases of COVID-19 carefully and separately, using **gloves** and a **gown**.

Wash clothes and linens using laundry soap and **hot water** (60-90°C), and dry on a hot setting.

*Laundry hampers should be lined with a disposable bag or be disinfected after use. Perform hand hygiene with soap and water immediately after handling dirty laundry.*

## Rotate towels and bedding

Each person should have their own bedding and towels, not to be shared.

Wash these on a regular schedule. Change bedding every one to two weeks, towels after three uses.

## Clean dishes and cutlery

in the dishwasher or separately in warm soapy water.
